

Information sheet for the course Designing production processes and systems

University: <i>Alexander Dubček University of Trenčín</i>					
Faculty: <i>Faculty of special technology</i>					
Course unit code: <i>STaM/D/3-53/d</i>			Course unit title: <i>Designing production processes and systems</i>		
Type of course unit: <i>optional</i>					
Planned types, learning activities and teaching methods: <i>2 hours of lectures / 0 hours exercise per week, Method of study: attendance method</i>					
Number of credits: <i>5</i>					
Recommended semester: <i>recommended in the 2nd semester in the 1st year</i>					
Degree of study: <i>III.</i>					
Course prerequisites: <i>none</i>					
Assessment methods: <i>During the semester will take place during the course: individual work and final evaluation: test</i>					
Learning outcomes of the course unit: <i>The student will acquire a deep cross knowledge and develop skills in designing the structure of production processes and production systems with potential application in science and research.</i>					
Course contents: <i>System design aspects of the production processes and systems. Computer aided design of manufacturing processes and systems. Characteristics of modern manufacturing systems. Analysis of realized production systems based on higher levels of automation. Design of automated manufacturing systems.</i>
