The credits are not granted to the students whose grade point average is 29 or lower.</i></p>	
<p>Learning outcomes of the course unit: <i>The selection of the texts for courses rests in clinical examples with more practical than theoretical outlook. A student is aware of values and skills necessary in modern health care. Thematic areas are: Administration of Medication, Reading the recipe, Intravenous infusion, Pre-operative medical assessment and education of a patient, Preparing a patient for surgery, Post-operative nursing care, Post-operative pain management, Nursing management of aggressive behaviour, Cerebrovascular accidents.</i> <i>A student has a detailed knowledge of the role of health care professionals in various environments, such as hospitals, community health centres, research and educational institutions.</i> <i>The educational activities to the texts develop the students in the ability to think critically, evaluate particular situation in nursing environment, and the expression of someone's attitude.</i> <i>The course is mainly focused on the devilment of the four language skills. The students are able to communicate in the field of health care. The students are self-assured in the usage of nursing English that increases their motivation.</i></p>	
<p>Course contents:</p> <ol style="list-style-type: none"> <i>1. Medicaments, therapies, their administration and control. Metabolism of medicaments.</i> <i>2. Working as the part of a team.
